NASR-EDDINE FARID

CYBERSECURITY & SOFTWARE ENGINEER

nasrdinefarid@gmail.com | +212 774-507869 | Youssoufia, Morocco | nafarid.me

PROFESSIONAL SUMMARY

Motivated Cybersecurity and Software Engineering student at 1337 Coding School (42 Network) with strong expertise in system architecture, network security, and low-level C/C++ programming. Proven ability in vulnerability assessment, penetration testing, and modern frontend web application development. Highly autonomous problem-solver dedicated to building robust, secure digital infrastructure and scalable applications.

PRACTICAL ENGINEERING PROJECTS

Webserv — HTTP/1.1 Web Server in C++ *2026*

- Developed critical parsing components for a custom, fully compliant HTTP/1.1 web server in non-blocking C++.
- Implemented robust parsing engines for server configuration files, incoming HTTP requests, and CGI outputs, ensuring accurate data extraction and zero memory leaks.

Minishell — Custom UNIX Shell Implementation *2025*

- Developed the execution engine for a custom UNIX shell in C, focusing entirely on pipeline execution and system integration.
- Implemented process management (`fork`, `execve`), file redirection (<, >, >>, <<), built-in commands (`cd`, pwd, `echo`, `env`, `export`, `exit`, `unset`), and asynchronous signal handling (`SIGINT`, `SIGQUIT`).

ft_transcendence — Frontend Web Application *Present*

- Engineered the frontend interface for a modern web application utilizing React and CSS.
- Implemented UI components for secure authentication flows, interactive dashboards, and API error handling with optimized client-side state management.

EDUCATION

1337 School (42 Network) *Present*

Software Engineering & Computer Science

- Peer-to-peer, project-driven curriculum focusing on low-level system programming, C/C++, algorithms, data structures, dynamic memory management, and UNIX systems.

ISTA NTIC *Jan 2023*

Specialized Technician in Digital Infrastructure & Cybersecurity

- Comprehensive training in network security, routing & switching, system administration, and infrastructure hardening.

TECHNICAL SKILLS

Cybersecurity: Penetration Testing, Vulnerability Assessment, Active Directory, Network Security

Languages: C, C++, Python, Bash, JavaScript

Systems & Networks: Linux/UNIX, TCP/IP, Routing & Switching

Web & DevOps: React, Docker, CSS, Git/GitHub

CERTIFICATIONS & LANGUAGES

- **ISC2:** Candidate Status - Cybersecurity
- **Cisco Networking Academy:** Packet Tracer
- **TryHackMe / Linux Institute:** Linux Fundamentals
- **Cybersecurity Training:** Active Directory Security
- **Boot.dev:** Learn JavaScript & Git

Arabic: Native / Fluent

English: Intermediate
