PROFESSIONAL SUMMARY

Motivated Cybersecurity and Software Engineering student at 1337 Coding School (42 Network) with strong expertise in system architecture, network security, and low-level C/C++ programming. Proven ability in vulnerability assessment, penetration testing, and modern full-stack web application development. Highly autonomous problem-solver dedicated to building robust, secure digital infrastructure and scalable applications.

PRACTICAL ENGINEERING PROJECTS

Webserv — HTTP/1.1 Web Server in C++ 2026

- Designed and implemented a custom, fully compliant HTTP/1.1 web server in non-blocking C++ utilizing socket programming and I/O multiplexing.
- Handled client connection lifecycles, HTTP request parsing, static file serving, CGI execution, and custom error pages with zero memory leaks.

Minishell — Custom UNIX Shell Implementation 2025

- Rebuilt a feature-complete UNIX shell in C with tokenization, AST parsing, environment variable expansion, and pipeline execution.
- Implemented process management (``fork``, ``execve``), file redirection (``<``, ``>``, ``>>``, ``<<``), built-in commands, and asynchronous signal handling (``SIGINT``, ``SIGQUIT``).

Full-Stack Web & Identity Platform 2026

- Engineered modern, secure user management web applications utilizing React, Tailwind CSS, and PocketBase backend.
- Implemented secure authentication flows, role-based access control, and API error handling with optimized client-side state management.

EDUCATION

1337 School (42 Network) Present

Software Engineering & Computer Science

- Peer-to-peer, project-driven curriculum focusing on low-level system programming, C/C++, algorithms, data structures, dynamic memory management, and UNIX systems.

ISTA NTIC Jan 2023

Specialized Technician in Digital Infrastructure & Cybersecurity

- Comprehensive training in network security, routing & switching, system administration, and infrastructure hardening.

TECHNICAL SKILLS

CYBERSECURITY

Penetration Testing

Vulnerability Assessment

Active Directory

Network Security

LANGUAGES

C

C++

Python

Bash

JavaScript

SYSTEMS & NETWORKS

Linux / UNIX

TCP/IP

Routing & Switching

Packet Tracer

WEB & DEVOPS

React
